## Description

Standard/reduced rectangular T-pieces (SRTP/RRTP) are used for connection of two deviations to the main duct or to create bifurcations in the duct sections, in order to evacuate or introduce air as evenly as possible.

It produced of galvanized steel metal sheet with built-in flanges (P20 and P30) for better rigidity.

T-pieces with decreased A side are also available for production.

Standard radius  $l1=l2=l3=150\text{mm}$ .
